

WEAPON KEYWORDS

Accurate x: You can retain up to x attack dice as normal successes without rolling them. If a weapon has more than one instance of Accurate x, you can treat it as one instance of Accurate 2 instead (this takes precedence over x rules above).

Balanced: You can re-roll one of your attack dice.

Blast x: The target you select is the primary target. After shooting the primary target, shoot with this weapon against each secondary target in an order of your choice (roll each sequence separately). Secondary targets are other operatives visible to and within x of the primary target, e.g. Blast 2* (they are all valid targets, regardless of a Conceal order). Secondary targets are in cover and obscured if the primary target was.

Brutal: Your opponent can only block with critical successes.

Ceaseless: You can re-roll any of your attack dice results of one result (e.g. results of 2).

Devastating x: Each retained critical success immediately inflicts x damage on the operative this weapon is being used against, e.g. Devastating 3. If the rule starts with a distance (e.g. 1* Devastating x), inflict x damage on that operative and each other operative visible to and within that distance of it. Note that success isn't discarded after doing so – it can still be resolved later in the sequence.

Heavy: An operative cannot use this weapon in an activation or counteraction in which it moved, and it cannot move in an activation or counteraction in which it used this weapon. If the rule is Heavy (x only), where x is a move action, only that move is allowed, e.g. Heavy (**Dash** only). This weapon rule has no effect on preventing the **Guard** action.

Hot: After an operative uses this weapon, roll one D6: if the result is less than the weapon's Hit stat, inflict damage on that operative equal to the result multiplied by two. If it's used multiple times in one action (e.g. Blast), still only roll one D6.

Lethal x+: Your successes equal to or greater than x are critical successes, e.g. Lethal 5+.
